

**PAOLA
LENTI**

MONACO YACHT SHOW 2023

Press release

Paola Lenti presents the new collection dedicated to the yachting designed by Espen Øino

The collaboration between the Norwegian designer and the Italian company has given birth to a collection distinguished by its minimalist designs and practicality for a life at the sea.

Monte Carlo, September 27-30, 2023

Simple lines and a great functionality: **the first yachting collection designed by Espen Øino for Paola Lenti** is premièred on the occasion of the 2023 edition of the Monaco Yacht Show.

Capri folding chair and deck chair, **Sabrina** small armchair and **Elianto** platform, are born from a shared design philosophy inspired by the principles of a timeless design. In today's complex world, the collection seeks synthesis. It embraces the idea that true elegance is found in essentiality.

"We have meticulously crafted each piece— **says Espen Øino** — paying great attention to **every detail**. Each line, material choice, and finish has been designed to harmonize form and function ensuring an exceptional outdoor experience".

The project is equally dedicated to **reducing environmental impact** through the use of **recyclable and recycled materials**. The padding, made of polyester fiber Aerelle® blue, is a testament to this common commitment, created from plastics recovered along riverbeds and at sea.

What truly sets this collection apart is its exceptional functionality tailored for life at sea. Espen Øino's rigorous approach to functional design, honed through extensive experience in designing mega yachts that blend luxury with practicality, is complemented by Paola Lenti's expertise in materials research. The **Capri chair and deck chair**, being folding and easily storable, create free space in compact environments. **Sabrina**, with its generous proportions, fosters convivial moments around the table during extended dinners or meetings aboard. Lastly, **Elianto**, thanks to its circular design, allows occupants to follow the sun without shifting the seat.

In 2003, Paola Lenti disrupted the market with a groundbreaking concept: an outdoor collection characterized by rich textiles, transcending the conventional boundary between indoor and outdoor spaces. Over two decades, the company has enjoyed unwavering success in the exclusive world of yachting, driven by the quality of its offerings, the exceptional performance of materials and fabrics in challenging weather conditions, and the extensive customization opportunities it offers to designers and yacht owners. “I find the nautical sector fascinating because it’s inherently challenging – **says Paola Lenti.** “It is a market that propels us to explore materials deeply and find innovative solutions that enhance the performance of products designed for residential use as well.”

The introduction of **the revolutionary high-tech Rope yarn in 2002 revolutionized outdoor furniture.** However, it’s the continual development of increasingly high-performance technical materials that has enabled the company to maintain and strengthen its position as a market leader. Materials like **Twiggy yarn**, a direct descendant of Rope, the **Maris fabric**, and the **Diade structural material** are just a few of the “tools” used today to create enduring furnishing elements and architectural accessories. These pieces are designed to withstand the test of time, impervious to water, UV rays, mold, and bacteria.

“We subject all our collections to more rigorous testing procedures than required by current regulations, examining each component separately,” **explains Anna Lenti, CEO.** “Aluminium, steel, paints, and fabrics undergo meticulous scrutiny by our technicians because we are committed to guaranteeing the long-term structural and aesthetic qualities of our products.”

It’s no wonder, then, that for more than a decade, Paola Lenti – exclusively distributed in the Principality by Sabrina Monte-Carlo – has been the preferred choice of the Monaco Yacht Show organizers. They trust Paola Lenti to furnish the Upper Deck Lounge, the most exclusive meeting and relaxation area of the event, as well as the VIP Entrances and the outdoor spaces overlooking the Parvis Piscine.

CAPRI

design by Espen Øino

The Capri series comprises a foldable director's chair and deck chair. It features an extruded aluminium structure with molded aluminium joints, stainless steel AISI 316 cross elements for the chair and back support for the deck chair. Details and spacers are crafted from molded plastic material. The structure is finished with a glossy varnish, and the covering is removable and available in the complete range of outdoor fabrics from our collection.

SABRINA

design by Espen Øino

Sabrina is a dining armchair with legs made from Aurea Optima oak heartwood, treated for oil and water repellency with a water-based or glossy varnish finish. Plastic spacers are included. The seat is equipped with elastic belts, padding composed of Aerelle® blue polyester fiber with a stress-resistant polyurethane insert, and a fixed foam covering in water-repellent polyester. The backrest padding also features Aerelle® blue polyester fiber with a stress-resistant polyurethane insert and a fixed foam covering in water-repellent polyester. The armchair has a fixed upholstery cover options, available in all the outdoor fabrics from our collection.

ELIANTO

design by Espen Øino

Elianto is a round platform with a structure made of matte varnished tubular stainless steel AISI 316 and a mesh in the same steel. It includes adjustable plastic feet. The padding is divided into three sections, shaped to conceal the steel base, revealing only part of the feet. The padding consists of Aerelle® blue polyester fiber with a stress-resistant polyurethane insert and a fixed foam covering in water-repellent polyester. The removable upholstery is offered in all the outdoor fabrics from our collection.

The platform is complemented by two rotating backrests and a side table attached to the structure. The backrests and side table supports are crafted from glossy varnished stainless steel AISI 316. Backrests feature padding with Aerelle® blue polyester fiber, a stress-resistant polyurethane insert, and a fixed foam covering in water-repellent polyester. The removable upholstery for the backrests is available in all the outdoor fabrics from our collection. The side table is detachable and doubles as a tray, with a top made of aluminium honeycomb and heartwood edge, both finished with gloss varnish in a colour coordinated with the table support.

For over twenty-eight years Espen Øino International has been hard at work designing custom motor yachts for an international clientele from Japan in the East to Seattle in the West. With a multicultural and multi-disciplined team of Twenty two based in the yachting capital of Monaco, the studio has made a significant impact in the new build market and is today considered one of the world's leading design studios for large bespoke motor yachts.

With a systematic and disciplined approach to problem solving combined with a thorough understanding of the engineering-related aspects of yacht design and naval architecture, the studio has produced designs for some of the most prestigious yachts such as: Skat, Princess Mariana, Octopus, Cloud 9, Galactica Super Nova, Dreamboat, Amadea, Madsummer, Hermitage, Valerie, Serene, Stella Maris, Solandge, Kismet, Elysian, Dilbar, Flying Fox, Crescent, Infinity, Energy, Norn, as well as the groundbreaking Silver series of high performance fuel efficient superyachts and the Amels 60m limited edition. to mention but a few. Powerboat designs include the Windy Shamal and Alizé, and the foil assisted Vandal Explorer catamaran.

Espen Øino International has received numerous coveted awards within the industry and enjoys the continued trust and respect of the world's leading yacht building yards. Many more projects and new builds are underway with new and exciting deliveries scheduled for the near future.

Founded in 1994, Paola Lenti is renowned worldwide for the innovative imprint it has been able to give to design products and for its unmistakable interpretation of colour. In almost thirty years of activity, the company has created a collection of exclusive fabrics and technical materials, eco-friendly and available in hundreds of shades. Paola Lenti indoor and outdoor collections and complements for the architecture are displayed in the most important international showrooms.
