STRAP SIDE TABLES

Press release

Outdoor Spring Vibes: The fresh patterns of Strap herald the upcoming season

An ancient craft imparts personality and character to contemporary design

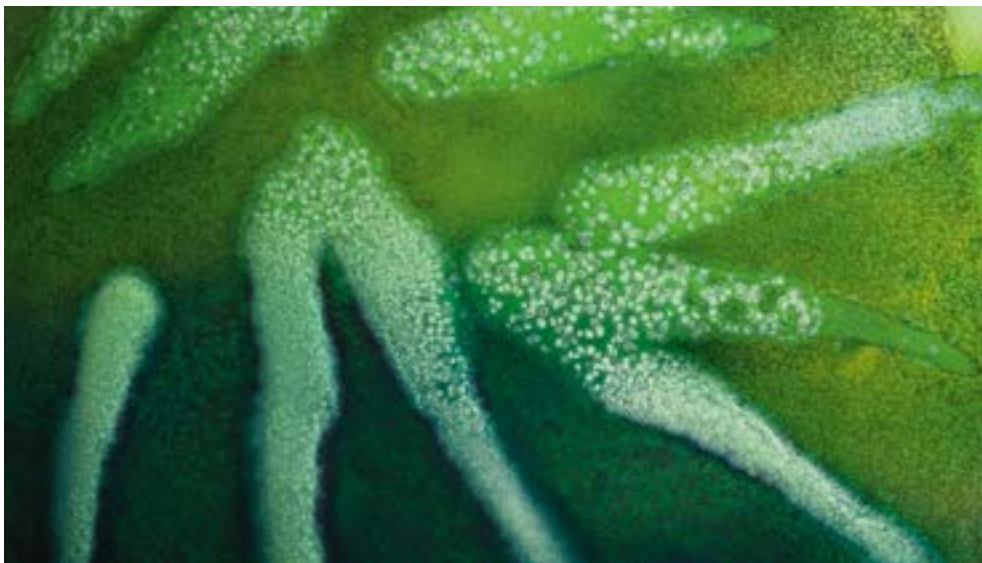

Spring is approaching. The Strap side table series welcomes its arrival with **new patterns** inspired by natural colours and forms. The vibrant hues of the large leaves designed on the **tabletops in enameled copper** stand out prominently, adding a distinctive touch that echoes the harmony and regenerative power of nature, an endless source of inspiration for Paola Lenti.

The true enchantment of Strap lies in the **Grand Feu enamelling, a sophisticated artisan technique with a millennia-old tradition**, seamlessly melding two seemingly incompatible materials, **metal and glass**. Handcrafted by **artist Alessandra Malfatti** in her Padua workshop, this enamelling method involves a meticulous and extended process of high-temperature melting, resulting in unique transparencies, opacities, and oxidations that vary with each creation. The allure of this artistic craft resides primarily in the lively and radiant colours, capable of infusing spaces of any style with a strong personality.

Conceived for outdoor use but equally suitable indoors, the Strap series adapts seamlessly to both contract and residential projects, whether in expansive settings or smaller spaces like **balconies and terraces**. It brings a touch of discreet elegance, enriching everyday life with a sense of style.

STRAP

design Victor Carrasco

The Strap series comprises side tables designed for outdoor use and is available in various dimensions. The structure is crafted from matte varnished aluminium in a graphite colour and is equipped with plastic spacers for added stability. The top, made of Esmal, undergoes a meticulous hand-finishing process on a copper surface, employing the ancient and intricate Grand Feu enamelling technique. Notably, the top's edge intentionally remains unenameled, allowing the material to naturally oxidize over time. This natural process results in a transition from a bright red hue to an intense brown colour, ultimately evolving into the classic oxide green patina. Additionally, Strap side tables are offered in an alternative version featuring both the structure and top crafted from matte or gloss varnished aluminium, available in the range of colours in the collection.

Founded in 1994, Paola Lenti is renowned worldwide for the innovative twist it has given to design products and for its unmistakable interpretation of colour. In almost thirty years of activity, the company has created a collection of exclusive fabrics and technical materials, eco-friendly and available in hundreds of hues. Paola Lenti indoor and outdoor collections and complements for the architecture are displayed in the most important international showrooms
